**Testimonial**

AutoSpec Technologies has done a great job with their implementation of our product Library delivering coatings solutions for the Architectural modelling tool, and has delivered great functionality in a very short timeframe.

Everyone I have dealt with has been completely professional and honest, whilst acting in the interest of his clients. Colin ensured that everything was resolved smoothly despite a somewhat difficult and complex Library.

I have been testing our Library's framework for our internal spec writing, which is brilliant for all users with full diagramming support for easy spec writing of PPG coatings as well as automatically generating a full comprehensive painting specification will be a valuable asset to our sales teams.
